

Name	Formula	Function
SUM	=SUM (range of values)	
SUMIF	=SUMIF (range, criteria, [sum range])	Sum the range of cells according to the criteria specified.
AVERAGE	=AVERAGE (range of values)	Mean value
MAXIMUM	=MAX (range of values)	
MINIMUM	=MIN (range of values)	
INTEGER	=INT (value)	Rounds a number down to the nearest integer that is less than or equal to it.
ROUNDDOWN	=ROUNDDOWN (value, places)	Rounds a number to a certain number of decimal places, always rounding down to the next valid increment.
ROUNDUP	=ROUNDUP (value, places)	Rounds a number to a certain number of decimal places, always rounding up to the next valid increment.
COUNT	=COUNT (range of values) or =COUNTA (range of values)	Counts the number of cells in selected range
COUNTIF	=COUNTIF (range, criterion)	Counts the cell if they fulfil the criteria
IF	=IF (logical expression, value if true, value if false)	Returns one value if a logical expression is `TRUE` and another if it is `FALSE`.
NESTEDIF	=IF (logical expression, value if true, IF (logical expression, value if true))	
VLOOKUP	<i>Create a named range first</i> =VLOOKUP (lookup value, [table array], column index number, range lookup)	Vertical lookup. Searches down the first column of a range for a key and returns the value of the indicated cell.
HLOOKUP	=HLOOKUP (lookup value, [table array], row index number, range lookup)	Looks in the top row of an array and returns the value of the indicated cell.
XLOOKUP	=XLOOKUP(lookup value, [table array], [return array], if not found, range lookup, search mode)	look in one column for a search term and return a result from the same row in another column, regardless of which side the return column is on.

[NEXT PAGE]

***Note:** There may be situations where you are required to pair a VLOOKUP with an IF function. Such will require the merging of two or more of these formulae and/or functions.

For example:

VLOOKUP paired with the IF function. This is a skill commonly tested in Paper 3 of 0417 ICT IGCSE.

E2	=IF(VLOOKUP(E1,\$A\$2:\$B\$10,2, FALSE)>=G2, "Yes!", "No")							
	A	B	C	D	E	F	G	H
1	Product	Sales		Product	Lime		Max sales	
2	Apples	\$120		Max sales?	Yes!		\$220	=MAX(\$B\$2:\$B\$10)
3	Apricots	\$115						
4	Bananas	\$0						
5	Cherries	\$110						
6	Kiwi	\$190						
7	Lemons	\$0						
8	Lime	\$220						
9	Oranges	\$130						
10	Peaches	\$170
