

ICT Classified -Chapter (2)

Input and output devices

1

This diagram shows a laptop computer being used in a measuring experiment.

(a) Apart from the keyboard, name **two** input devices shown in the diagram above.

1.....

2..... [2]

(b) Name **two** output devices shown in the diagram above.

1.....

2..... [2]

Q1 – Page2 0417/11 May/June 2015

2

Tick the **most** appropriate method of inputting data for the following uses.

Use	MICR ✓	Trackerball ✓	Sensor ✓
Reading data from a cheque			
Inputting the temperature of a greenhouse			
People with limited motor skills using computers			
Inputting the amount of humidity in a weather station			

[4]

Q2 – Page2 0417/11 May/June 2015

3

Complete the table by identifying the **most** appropriate output device for each type of application.

Application	Device
Produces very high quality printing where speed is not an issue	
Production of continuous stationery where noise is not an issue	
Produces rapid, high quality and high volume printing	
Produces very large printouts such as size A0	

[4]

Q3 – Page3 0417/11 May/June 2015

4

This diagram shows a tower PC.

(a) Name **two** input devices apart from a keyboard and mouse, which could connect directly to the tower.

1

2 [2]

(c) Name **two** output devices which could connect directly to the PC shown above.

1

2 [2]

Q1 – Page2 a-c 0417/12 May/June 2015

5	Below is a list of uses of ICT. Tick the device which would be most appropriate for each activity. <table> <tr> <th></th><th>Input device ✓</th><th>Output device ✓</th><th>Storage device ✓</th></tr> <tr> <td>Making a backup of work</td><td></td><td></td><td></td></tr> <tr> <td>Typing a document</td><td></td><td></td><td></td></tr> <tr> <td>Printing out student records</td><td></td><td></td><td></td></tr> <tr> <td>Reading details from a bar code</td><td></td><td></td><td></td></tr> <tr> <td>Making a soft copy for future use</td><td></td><td></td><td></td></tr> </table>		Input device ✓	Output device ✓	Storage device ✓	Making a backup of work				Typing a document				Printing out student records				Reading details from a bar code				Making a soft copy for future use			
	Input device ✓	Output device ✓	Storage device ✓																						
Making a backup of work																									
Typing a document																									
Printing out student records																									
Reading details from a bar code																									
Making a soft copy for future use																									
	Q3 – Page3 0417/12 May/June 2015																								

6	There are a number of methods of direct data entry. Complete the sentences using words from the list below. (a) The method of inputting bank codes from the bottom of a cheque is called [1] (b) The device used for inputting details from a label on a product is called [1] (c) The device used for inputting data directly from a bank card is called [1] a bar code reader MICR a mouse a PIN pad a keyboard a chip reader OMR a graphics tablet
	Q5 – Page4 0417/12 May/June 2015

[6]

Q8 – Page7 0417/12 May/June 2015

8

This diagram shows a smart phone.

(a) Name **two** input devices shown on the phone diagram.

1

2

[2]

Q1 – Page2 0417/13 May/June 2015

9

Tick the **most** appropriate method of inputting data for the following uses.

Use	MICR ✓	Bar code reader ✓	OMR ✓
Inputting exam answers from a multiple choice test paper			
Inputting the account number from the bottom of a cheque			
Inputting the ISBN from the back cover of a book			
Inputting pencil marks from a school register			

[4]

Q2 – Page3 0417/13 May/June 2015

10	Data can be input to a computer using direct data entry methods. Write down the most appropriate device to input the following: (a) information from the chip in an electronic passport [1] (b) text from an id card [1] (c) account details from the front of a credit card at an EFTPOS terminal [1] (d) account details from the back of a credit card at an EFTPOS terminal [1] Q1 – Page2 0417/11 May/June 2016
11	Write down the most appropriate input device which matches the following descriptions: (a) This is provided with a laptop to imitate the functions of a mouse. [1] (b) This is not a mouse but is used to manoeuvre objects around the screen in computer video games. [1] (c) This is used to type in text. [1] (d) This is used for direct input of hard copy images. [1] Q1 – Page2 0417/12 May/June 2016

12	Tick whether the following statements are true or false. <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 10px;"> <thead> <tr> <th style="width: 70%;"></th> <th style="width: 15%; text-align: center;">true (✓)</th> <th style="width: 15%; text-align: center;">false (✓)</th> </tr> </thead> <tbody> <tr> <td>A microphone is an output device.</td> <td></td> <td></td> </tr> <tr> <td>The Control Unit is part of the Central Processing Unit.</td> <td></td> <td></td> </tr> <tr> <td>The Arithmetic and Logic Unit is part of the Central Processing Unit.</td> <td></td> <td></td> </tr> <tr> <td>A temperature sensor is an input device.</td> <td></td> <td></td> </tr> </tbody> </table> [2]		true (✓)	false (✓)	A microphone is an output device.			The Control Unit is part of the Central Processing Unit.			The Arithmetic and Logic Unit is part of the Central Processing Unit.			A temperature sensor is an input device.		
	true (✓)	false (✓)														
A microphone is an output device.																
The Control Unit is part of the Central Processing Unit.																
The Arithmetic and Logic Unit is part of the Central Processing Unit.																
A temperature sensor is an input device.																
Q2 – Page2 0417/12 May/June 2016																
13	Explain why magnetic ink is used rather than bar codes on a cheque. [2]															
Q10 – Page6 -b 0417/12 May/June 2016																
14	Data can be input to a computer using different devices. Write down the most appropriate input device which will enable you to: (a) type an essay [1] (b) select options from a drop down menu whilst moving the device [1] (c) read the temperature [1] (d) fly an aircraft in a video game. [1]															
Q1 – Page2 0417/13 May/June 2016																

15

A student exam answer sheet consists of boxes or lozenges which the student shades in to indicate their choice of answer.

- (a) Apart from the details of the test and the lozenges, give **two** items of information, essential to the student, that are pre-printed on the answer sheet.

1

.....

2

.....

[2]

- (b) Describe how Optical Mark Recognition is used to process the details from the form.

.....

.....

.....

.....

.....

.....

[3]

- (c) Describe the drawbacks of using Optical Mark Recognition.

.....

.....

.....

.....

.....

.....

[3]

Q10 – Page7 0417/13 May/June 2016

16	When a person buys goods in a supermarket they have to pay at the checkout. (a) Identify two input devices used at the checkout. 1..... 2..... [2] (b) Identify two output devices used at the checkout. 1..... 2..... [2] Q1 – Page2 0417/11 May/June 2017								
17	Using the list, write down the most appropriate output device to produce the following. <table border="0" style="width: 100%;"> <tr> <td>3D printer</td> <td>dot matrix printer</td> <td>graph plotter</td> <td>keyboard</td> </tr> <tr> <td>monitor</td> <td>mouse</td> <td>speaker</td> <td>SSD</td> </tr> </table> (a) High resolution drawings in hard copy. [1] (b) Sound from a computer. [1] (c) A solid object. [1] (d) Scenes from a video game. [1] Q1 – Page2 0417/13 May/June 2017	3D printer	dot matrix printer	graph plotter	keyboard	monitor	mouse	speaker	SSD
3D printer	dot matrix printer	graph plotter	keyboard						
monitor	mouse	speaker	SSD						

18

Midwest School library has a database system. Students who borrow books present their library cards containing their details. The librarian wishes to improve security by introducing biometric methods.

(a) Name **two** direct input methods the cards could use.

- 1.....
.....
- 2.....
.....

[2]

(b) Give **two** examples of biometric input.

- 1.....
.....
- 2.....
.....

[2]

(c) Name and describe in detail the files the library database system would use.

-
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

[4]

Q6 – Page5 0417/13 May/June 2017

- 19 Complete the following sentences, using the most appropriate items from the list below.
- A 3D printer An ADC A compiler An interpreter A microphone
A monitor A numeric keypad A speaker A switch A USB
- (a) is a device used to input a PIN. [1]
- (b) analyses and executes a program line by line. [1]
- (c) produces output in the form of solid objects. [1]
- (d) produces output in the form of sound. [1]

Q1 – Page2 0417/11 May/June 2018

- 20 Circle the names of **three** devices which are used for input.
- CD writer Laser printer Pen drive Mouse
Speaker Touch screen Remote control Wide format printer
- [3]

Q4 – Page2 0417/11 May/June 2018

- 21 Data can be input into computers using direct data entry.
Tick the most appropriate method of direct data entry for each statement.
- | | MICR
(✓) | OMR
(✓) | OCR
(✓) |
|---|-------------|------------|------------|
| Used to read magnetic data on cheques. | | | |
| Used to read car number plates. | | | |
| Used when entering handwritten text. | | | |
| Used to read multiple-choice examination responses. | | | |
- [4]

Q3 – Page2 0417/13 May/June 2018

22 Circle **two** items which are used as output devices.

3D printer

Magnetic tape

Microphone

Monitor

Sensor

Web cam

[2]

Q4 – Page3 0417/13 May/June 2018

23 Direct data entry is one method of entering data into a computer.
For each statement in the table below, write down the most appropriate input device from the list.

Bar code reader

Chip reader

Keyboard

Magnetic stripe
reader

MICR

Microphone

Mouse

PIN pad

RFID reader

Temperature
sensor

Statement	Input device
The device used to input the account number printed at the bottom of a cheque	
The device used to input the four-digit code when a debit card is used	
The device used to input the data made up of black lines and spaces on household goods	
The device used to input the data from a contactless credit card	

[4]

Q1 – Page2 0417/11 May/June 2019

24

Tick whether the following examples refer to dot matrix, laser or 3D printers.

	dot matrix (✓)	laser (✓)	3D (✓)
This printer uses continuous stationery.			
This printer uses toner.			
This printer is most suitable for a quiet environment.			
This printer produces solid objects.			

[4]

Q4 – Page3 0417/11 May/June 2019

25

Name the piece of hardware found in a tablet computer that is both an input and output device.

.....
 [1]

Q1 – Page2 - d 0417/12 May/June 2019

26

Circle **two** items which are used for direct data entry.

Keyboard

MICR

Microphone

Mouse

Printer

RFID

[2]

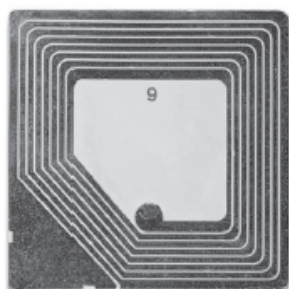

Q3 – Page3 0417/12 May/June 2019

27	A bank has trialled the replacement of Magnetic Ink Character Recognition (MICR) for the details at the bottom of the cheques with bar codes. Describe two advantages of using Magnetic Ink Character Recognition (MICR) rather than bar codes when processing cheques. [2] Q3 – Page2 0417/13 May/June 2019
28	Truck repair shops tend to use dot matrix printers to produce their invoices. Identify two advantages of using a dot matrix printer rather than a laser printer in this environment. [2] Q4 – Page3 0417/13 May/June 2019

29

Data can be read directly by using a number of different devices.

Name the most appropriate device used to read the following data.

.....

Cheque No.	Branch Code	Account No.	Transaction Code
05482	55448	654478	25447

.....

.....

.....

[4]

Q3 – Page3 0417/11 May/June 2020

30

Point of sale (POS) terminals are used in supermarkets.

- (a) Tick (✓) which of the following devices used at a POS terminal are only input devices, which are only output devices and which are both.

Device	Input (✓)	Output (✓)	Both (✓)
Bar code reader			
Buzzer			
Touch screen on till			
Receipt printer			
Light sensor on the conveyor belt			
Electronic scales			

[6]

Q9 – Page11 0417/11 May/June 2020

31

Complete each sentence using the most appropriate output device from the following list.

3D printer Buzzer Dot matrix printer Heater
Laser printer LCD monitor Light Wide format printer

- (a) The device that can produce prosthetic limbs is called a

..... [1]

- (b) The device that can output soft copy is called a

..... [1]

- (c) The device that can produce sound as its main output is called a

..... [1]

Q7 – Page9 0417/12 May/June 2020

32

Facial recognition is an example of biometrics. Direct data entry devices can be in three forms. One is biometrics. The second is contactless where the item being read does not touch the reader. The third is physical where the item being read does touch the reader.

Tick (✓) whether the following are the most appropriate examples of biometrics or contactless or physical direct data entry.

	biometrics (✓)	contactless (✓)	physical (✓)
RFID			
Magnetic stripe			
Retina scan			
Voice recognition			

[4]

Q7 – Page10 - b 0417/13 May/June 2020
