Q 12 – Page 11 0417/13 May/June 2017

5

The following notes summarise this chapter, but they have missing words. Using the words below, copy out and complete sentences **A** to **I**. Each word may be used more than once.

legislation **dongle** **money** **encrypt** **piracy**
digital **viruses** **needs** **audience**

- A** When designing an ICT solution to a problem you should always think about the requirements of your intended _____.
- B** The audience will have _____ which have to be satisfied by your ICT solution.
- C** The illegal copying of computer software is called software _____.
- D** Copyright _____ are laws which make it a crime to illegally copy software and other copyrighted material such as text, images, music, etc.
- E** Copying software illegally is no different from stealing, as it deprives someone of _____.
- F** You have to be careful of illegally copied software as it often contains _____ that can be copied onto your computer.
- G** One method that software producers use to prevent illegal copying of software is by the use of a _____.
- H** Some software producers _____ the execution code of the software so that a key is needed to unlock the code and allow the software to run.
- I** A _____ signature can also be used to help prevent illegal copying.

6

Tick **True** or **False** next to each of these statements. [5]

	True	False
The illegal copying of computer software is an example of software piracy.		
Copying software is always illegal.		
Software piracy is acceptable as it helps us obtain software cheaper or sometimes even for free.		
Software licences usually allow you to run a certain number of computers with the same software.		
Copying deprives small software producers of money.
